

Abdullah Gül University Climate Action Plan 2019-2029

Prepared by

Dr. Fatma Şener Fidan

Publication Year 2019

Revised 2023

Contact sustainability@agu.edu.tr Climate change remains one of the biggest challenges we face world-wide. It is inevitable to fight effectively against this global threat, come together and move towards a sustainable future. Abdullah Gül University (AGU) is aware of this historical responsibility and acts with determination.

Scientists and climate experts around the world agree that we must be in a period where we feel the effects of climate change more clearly. Effects such as increasing temperature, extreme weather events, sea level rise and degradation of ecosystems deeply affect both people and nature. In this context, AGU has prepared this Climate Action Plan in order to take a leading role in the fight against climate change.

This Climate Action Plan includes our targets and strategies for the period between 2019 and 2029. Our plan includes concrete actions on issues such as reducing carbon emissions, increasing energy efficiency, promoting sustainable transportation, improving waste management and adapting to climate change.

This plan also aimed to encourage the participation of our university community and all our stakeholders. Our students, faculty, staff, and local community will play a key role in the successful implementation of this plan. They came together to share our commitment to climate action and achieving our carbon reduction targets and played an active role in the preparation of an important road map.

Implementation of this Climate Action Plan will not only protect our environment, but also teach our students leadership in sustainability and reflect our commitment to leaving a livable world legacy for future generations.

AGU is aware that it bears more responsibility in combating climate change and has taken steps to fulfill this responsibility with this Climate Action Plan. Considering that every institution and individual has a share in the fight against climate change, we will continue our activities to move towards a sustainable future together.

About AGU

AGU, the first Turkish Public University supported by a philanthropic foundation (AGUV), was established on 21 July 2010 and enrolled its first students in the 2013-2014 academic year. AGU was established in the city of Kayseri, a Historical, Industrial and Touristic Hub of Türkiye counting 1,5 Mio inhabitants.

AGU was designed as a Socio-Technical University Model for Higher Education, an on-going initiative supported by the Turkish Ministry of Development. The project was defined with the help of over 20 Search Conferences and 40 Workshops, and has aimed at pioneering the New Generation University model in Türkiye, with unique and innovative curricula and educational processes, with the objective of disseminating the project's findings across all higher education institutions in the country and beyond.

This pilot project, started in 2010 by the Turkish State to reform the Higher Education, was shaped by +700 contributors from Universities, Corporations, NGOs, etc. and is the 1st cross-sectorial initiative for a Hybrid University Model.

AGU, as a research university seeking solutions to global challenges through partnerships and learner-centered approaches, aims to raise citizens who can contribute to their communities and shape the future by converting knowledge into personal and social values.

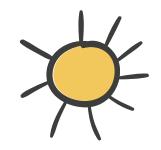

With its mission focusing on societal impact, AGU targets global challenges, which will also stimulate students' professional careers and ambitions. AGU aspires to the ways of engagement with UN sustainable development goals (SDGs) through the provision of qualified human resources, development of technology, production of patents, founding new start-up companies, running industrial projects, development of economic and social policies, contribution to the culture, and the dissemination of knowledge to the society.

AGU's primary objective is to pioneer "New Generation Universities" by blending the three university missions (1st Education, 2nd Research and 3rd Societal Impact) via innovative approaches, focusing particularly on the 3rd mission.

RELATIONSHIP BETWEEN AGU CLIMATE ACTION PLAN AND SUSTAINABLE DEVELOPMENT GOALS

Environmental sustainability has become an important priority today. In this context, calls have been made to set many international goals such as the UN Sustainable Development Goals, the EU Green Deal and the EU Circular Economy Action Plan. The Paris Climate Agreement, which is a continuation of the Kyoto Protocol process, emerged as a result of all institutions and individuals seeing the increase in environmental problems and trying to prevent them. In this context, with Türkiye becoming a party to the agreement, AGU has made

commitments to reduce this damage in the developing process. Continuing its activities with the awareness of an international university, AGU aims to reduce its environmental impact and contribute to this global movement in the world with its activities to achieve sustainability goals. In line with these, it carries out its activities in accordance with the United Nations Sustainable Development Goals (SDGs). The SDGs supported by this Climate Action Plan are listed below.

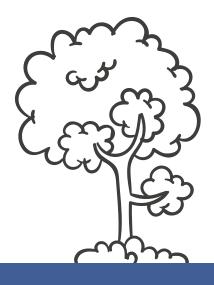

| Goal | Aims | CAP Focus Areas in AGU |
|--------|---|---|
| SDG 4 | The aim is to ensure inclusive and equitable quality education and provide lifelong learning opportunities for local, national and global communities | Educational programs Training programs Outreach activities Access schemes |
| SDG 6 | The aim is to ensure availability and sustainable management of water and sanitation | Water-conscious use Water-conscious building Water-conscious planting Water reuse projects Water footprint calculation & verification |
| SDG 7 | The aim is to ensure access to affordable, reliable, sustainable and modern energy | Energy efficient consumption Energy efficient renovation and building Energy wastage identification Energy management System Carbon reduction and emission reduction project |
| SDG 11 | The aim is to make cities inclusive, safe, resilient and sustainable | Sustainable commuting arrangements Sustainable commuting projects Building on brownfield sites Sustainable travel Sustainable transportation of goods |
| SDG 12 | The aim is to ensure sustainable consumption and production patterns | Waste management Waste minimizing Waste recycling & reusing Engagement & integration of supplier |
| SDG 13 | The aim is to take urgent action to combat climate change and its impacts | Climate Action Commitment to carbon neutral Carbon footprint calculation & verification Carbon reduction and emission reduction project Energy efficient consumption Low-carbon energy use Collaborate with NGOs |
| SDG 14 | The aim is to conserve and sustainably use the oceans, seas and marine resources | Waste management Plastic waste minimizing Water discharges management Water footprint calculation & verification Sustainably harvested food management Biodiversity protection activities Aquatic ecosystem damage prevention |
| SDG 15 | The aim is to sustainably manage forests, combat desertification, halt and reverse land degradation, halt biodiversity loss | Sustainable use, conservation and restoration of land Waste management Waste minimizing Sustainably farmed food management Biodiversity protection activities Alien species impact reduction Collaboration for shared land ecosystems |
| SDG 17 | The aim is to strengthen the means of implementation and revitalize the global partnership for sustainable development | Cooperation with government Cooperation with NGOs Cooperation for cross-sectoral dialog Educational programs Training programs |

In this context, implementing this plan to fulfill our responsibility as a university in the fight against climate change represents our commitment to leave a livable world for future generations. Together, we will work to achieve these goals and move forward together to build a sustainable future. By reaffirming our commitment to combat climate change and our commitment to support this Climate Action Plan, we declare that we will work together to move towards a sustainable future. This Climate Action Plan includes AGU's goals, objectives, and activities in the following areas towards becoming a carbon neutral university.

Carbon Emissions of AGU for 3-Year Period

Net Emission Differences by the Last Year

| Categories | 2022 | 2023 | Difference Amount | Difference in % by the Last Year |
|---------------------|----------|---------|-------------------|-------------------------------------|
| Category 1 | 1069,469 | 883 | 186,469 | 17% |
| Category 2 | 1500,75 | 1387,16 | 113,59 | 8% |
| Category 3 | 815,48 | 207,51 | 607,97 | 75% |
| Category 4 | 69,66 | 757,37 | -687,71 | -987% |
| Category 5 | N/A | 1514,86 | 1514,86 | N/A |
| Category 6 | 150,08 | 138,72 | 11,36 | 8% |
| Net Total Emissions | 3605,439 | 4888,62 | | |

1. Climate Action

| Dimension | Goal | Targets | Target Year | Activities | Main Responsible | Support departments | Status of activities |
|-------------------|---|--|----------------|---|-----------------------|---|----------------------|
| | | | | A.1 Calculate and verify category 1 emissions | | Construction and Technical Works Department Energy Management Unit waste management committee | Achieved |
| | | T.1 Reduce net emissions from category 1 to zero | 2027 | A.2 Evaluate carbon pricing mechanisms | | | Progress |
| | G.1 Achieving Carbon Neutrality by 2029 | by 2027 | | A.3 Prioritizing emission sources according to emission amounts for reduction | Sustainability Office | | Achieved |
| | | emissions from category 2 to zero by 2024 T.3 Reduce net emissions from | 2024 | A.4 Calculate and verify category 2 emissions | | | Achieved |
| Climate Action | | | | A.5 Evaluate carbon pricing mechanisms. | | | Progress |
| 7.00.011 | | | | A.6 Prioritizing emission sources according to emission amounts for reduction | | | Achieved |
| | | | 2028 | A.7 Calculate and verify categories 3,4,5,6 emissions | | | Achieved |
| | | | | A.8 Evaluate carbon pricing mechanisms. | | | Progress |
| | | | | A.9 Prioritizing emission sources according to emission amounts for reduction | | | Achieved |

AGU managed to reduce its Category 1 net emissions from 1069.47 to 883, representing a 17% reduction in net emissions in this category compared to last year. A similar improvement was observed in the net emission values of AGU belonging to Category 2. AGU succeeded in decreasing its Category 2 net emissions from 1500,75 to 1387,16, representing a %7.5 reduction in net emissions in this category compared to last year. AGU was also successful in reducing its net emissions from Category 3 (from 815,48 to 207,51) and Category 6 (from 150,08 to 138,72). It can be said that AGU has been progressing in reducing its net carbon emissions in parallel with the targets specified in the Climate Action plan. These improvements can be evaluated as important indicators demonstrating AGU's strong commitment to being a carbon-neutral university by 2029. On the other hand, AGU has increased its net carbon emissions from Category 4 (from 69,66 to 757,37) and Category 5 (from N/A to 1514,86) due to its ongoing investments at the Sümer Campus.

2. Energy

| Dimension | Goal | Targets | Target Year | Activities | Main Responsible | Support departments | Status of activities | | |
|-----------|-----------------------------------|--|----------------|--|---|---|----------------------|--|----------|
| | | | | A.10 To ensure that periodic maintenance is carried out on time. | | | Achieved | | |
| | | T.4 Reducing Electrical | | A.11 To replace equipment that significantly reduces energy efficiency with new systems. | | | Achieved | | |
| | | Intensity by 2% every year | 2023 | A.12 Preferring energy efficiency prod- ucts and materials to be purchased | | | Achieved | | |
| | G.2 Achieving | | | A.13 To ensure that controls regarding energy efficiency are carried out on time. | | | Achieved | | |
| | Energy efficient consumption | | | A.14 To ensure that periodic maintenance is carried out on time. | | Sustainability Office Energy Management Unit Waste Management Committee | Achieved | | |
| | G.3 Achieving Energy efficient | nergy efficient novation and uilding | 2023 | A.15 To replace equipment that significantly reduces energy efficiency with new systems. | Construction and Technical Works Department | | Achieved | | |
| Energy | building G.4 | | | A.16 Preferring energy efficiency products and materials to be purchased | | | Progress | | |
| | Establishing Energy | | | A.17 To ensure that controls regarding energy efficiency are carried out on time. | | | Achieved | | |
| | System G.5 Achieving | | | A.18 To ensure that all vehicles are maintained periodically. | | | Achieved | | |
| | Low-carbon energy use | Consumption 2% every year | 2023 | A.19 Having regular emission inspections | | | Achieved | | |
| | | | | A.20 Providing training to drivers and users on economical driving techniques | | | Progress | | |
| | | T.7 Increasing Energy Efficiency Training Hours by 2% every year | 2023 | A.21 Having periodic training for all | | | Achieved | | |
| | | T.8 Establishing Energy management System | 2023 | A.22 Fulfillment of system requirements | | | Achieved | | |
| | | Т | T.9 Incre | T.9 Increasing energy production from solar energy 20% by 2026 | 2026 | A.23 Solar panels installation | | | Progress |

AGU managed to reduce its electrical intensity from 760,71 to 727,61 by the last year, representing a %4.3 reduction, and it has been successful in actualizing Target 4 in the Energy section. AGU has also been successful in actualizing its target related to natural gas consumption (Target 5) from 434.404,51 to 424.489, 31, representing a %2.2 reduction. AGU has sustained its commitment to energy efficiency and provided its staff with various trainings on energy efficiency. In 2023, a total of 8 trainings on energy efficiency were provided to staff. These trainings, which required voluntary participation, lasted 6.9 hours (414 min.) in total. AGU continues its efforts in the field of establishing an Energy Management System with determination (Target 8). Please note that all achieved targets are integrated into business processes and are improved periodically every year.

Progress in 2023

AGU Energy Management Unit Directive published.

Energy Efficiency Policy published.

Energy Efficiency Strategy published.

Savings Target and Implementation Guide In Public Buildings published.

Energy Efficiency Checklist published.

LEED Silver Award owned.

ISO 50001 Enegy Management System was established. https://enerji.agu.edu.tr/

Energy Audit conducted by third party company with licence

Solar Panels installed

3. Waste

| Dimension | Goal | Targets | Target Year | Activities | Main Responsible | Support departments | Status of activities |
|-----------|--|--|----------------|--|----------------------------|---|----------------------|
| | G.6 Implementation | T.10 Reduce general waste per person by 5% every year | 2024 | A.24 Having periodic training for all | Waste Management Committee | | Progress |
| | Waste management G.7 Achieving Waste minimizing G.8 Increasing Waste recycling & reusing | T.11 Reducing plastic waste per person by 7% every year | 2024 | A.25 Having periodic training for all | | Construction and Technical Works Department Department of Health, Culture and Sports Sustainability Office | Progress |
| Waste | | T.12 Establishing waste management System | 2022 | A.26 Fulfillment of system requirements | | | Achieved |
| | | T.13 At least 70% of suppliers achieve plastic Free goods and services | 2026 | A.27 Supplier management systems and plans | | | Progress |
| | G.9 Achieving | T.14 Improving disposal methods for | 0000 | A.28 Implementing circular economy initiatives. | | | Progress |
| | Plastic waste minimizing | 20% of waste | 2026 | A.29 Project implementation with NGOs and Municipality | | | Progress |

2023 Progress

Waste Management Commission has worked actively.

Campus Waste Management Activities were carried out.

Waste Management Directive was implemented.

Plastic Use Reduction and Disposable Products Policy was created.

All wastes were included AGU GHG calculations and verified by third partly company.

Zero Waste Certificate implemented

AGÜ Technical Specifications for Food Tender was applied.

Paper use has been reduced with electronic systems.

4. Water

| Dimension | Goal | Targets | Target Year | Activities | Main Responsible | Support departments | Status of activities |
|-----------|--|---|----------------|---|------------------|---|----------------------|
| | G.10 Achieving Water-conscious use | T.15 Reducing water Intensity by 3% everyyear | | A.30 Having periodic training for all | | | Progress |
| | G.11 Achieving Water-conscious building | | yyear 2024 - | A.31 Ensuring that all water-consuming fixtures and urinal have sensors to minimize water consumption | Construction and | Sustainability Office Energy Management Unit Waste Management Committee | Achieved |
| | G.12 Achieving Water-conscious planting | | | A.32 Planting periodic water-conscious plants | | | Achieved |
| | G.13 Implementing Water reuse | | | A.33 Re-examination of existing water equipment in line with new criteria | | | Progress |
| Water | projects G.14 Water footprint calculation & verification G.15 Improving Water discharges management G.16 Providing Aquatic ecosystem damage | T.16 Increasing collected rainwater by 40% by 2027 | 2027 | A.34 installation of new rainwater harvesting systems | | | Progress |
| | | T.17 Increasing the amount of recycled water by 40% by 2025 | 2025 | A.35 Expanding the gray water collection system to all buildings to reuse water in sinks | | | Progress |
| | | T.18 Establishing water footprint management System | 2023 | A.36 Fulfillment of system requirements | | | Achieved |

Progress in 2023

Water footprint calculated according to the ISO **14046** Water footprint version and verified by third party accredited audit company.

| Indicator | Unit | Amount |
|-----------------------|---------|-----------|
| Green Water Footprint | m³/year | 108 |
| Blue Water Footprint | m³/year | 164674,41 |
| Gray Water Footprint | m³/year | 13306,84 |

Water Management Policy revised.
Grey Water Treatment System continued.
LEED Silver Award owned.

90% of the faucets used have sensors and water-saving spray filters are used at the ends of the taps.

4. Commuting and Transportation

| Dimension | Goal | Targets | Target Year | Activities | Main Responsible | Support departments | Status of activities |
|------------------------------------|---|---|--|---|---|--|----------------------|
| | | T.19 By 2026, at least 35% of students will come to 2026 A.37 Having periodic training for all university on foot | | Progress | | | |
| | | | | A.38 Develop a Campus Transport and Accessibility Plan | | | Progress |
| | | T.20 At least 45% of students should cycle to university by 2026 | 2026 | A.39 Providing secure bicycle storage and end-of-trip facilities in key cam- pus locations | | | Achieved |
| | G.17 Achieving Sustainable | | | A.40 Establishing bicycle sharing system | | | Progress |
| | commuting arrangements G.18 Achieving Sustainable | rrangements i.1.21 By 2026, at least 10% of students should come to university by public | 2026 | A.41 Develop a Campus Transport and Accessibility Plan | Department of Health, Culture and Sports | Sustainability Office Energy Management Unit Waste Management Committee Construction and Technical Works | Progress |
| Commuting and Transportation | commuting projects G.19 Achieving | T.22 By 2026, at least 45% of employees will have access to university on foot. | 2026 | A.42 Having periodic training for all | | | Progress |
| | Sustainable travel | Sustainable travel | | A.43 Develop a Campus Transport and Accessibility Plan | | | Progress |
| | G.20 Achieving Sustainable transportation T.23 At least 20% of employees should cycle to university by 2026 | 2026 | A.44 Providing secure bicycle storage and end-of-trip facilities in key campus locations | | Department | Achieved | |
| | of goods | | | A.45 Establishing bicycle sharing system | | | Progress |
| | | T.24 By 2026, at least 25% of students must come to university by public transport | 2026 | A.46 Develop a Campus Transport and Accessibility Plan | | | Progress |
| | | T.25 Replacing university vehicles with electric vehicles and promoting the use of electric vehicles | 2027 | A.47 Evaluating opportunities to install AV and VC facilities and promote these as an alternative to travel | | | Waiting |

4. Commuting and Transportation

| Dimension | Goal | Targets | Target Year | Activities | Main Responsible | Support departments | Status of activities |
|------------------------------------|--|--|----------------|---|---|---|----------------------|
| | G.17 Achieving Sustainable commuting arrangements G.18 Achieving Sustainable commuting | T.26 Decrasing carbon emissions from work travel %10 by 2024 | 2024 | A.48 Measuring and offset business travel carbon emissions | | Sustainability Office Energy Management | Achieved |
| Commuting and Transportation | G.19 Achieving Sustainable travel G.20 Achieving Sustainable transportation of goods | T.27 Achieving Sustainable transportation of goods 40% by 2026 | 2027 | A.49 Establishing supplier management system | Department of Health, Culture and Sports | Unit Waste Management Committee Construction and Technical Works Department | Progress |

2023 Progress

Revised campus transportation plan

Pedestrian-Friendly Campus

All commuting and travels were included in AGU GHG calculations and verified by third partly company.

free transportation services to its members provided.

Supplier survey was conducted.

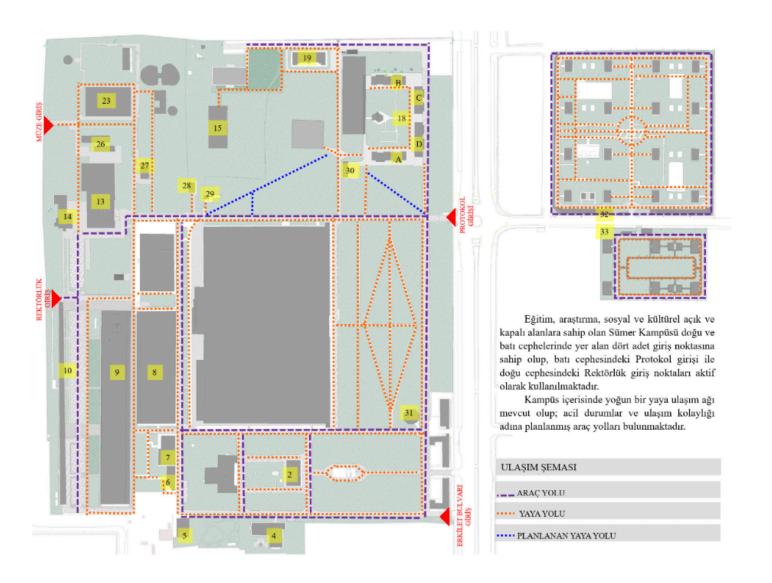

Campus Transport and Accessibility Plan has been prepared.

AGU revised its on-campus transportation system and switched to a vehicle registration system. Thus, a limited number of vehicles were allowed to enter the campus and the roads within the campus were rearranged to prevent the use of vehicles to travel from one place to another within the campus. The campus is only suitable for pedestrian, bicycle, and scooter transportation. You can see the AGU Sümer Campus campus map below.

5. Land

| Dimension | Goal | Targets | Target Year | Activities | Main Responsible | Support departments | Status of activities |
|-----------|---|--|----------------|--|---|--|----------------------|
| | G.21 Building on brownfield sites G.22 Biodiversity protection activities G.23 Sustainable use, conservation, and restoration of land | T.28 Making 80% of brownfield areas available for use by 2025 | 2025 | A.50 Making AGU's brownfield areas available for use | Administrative and Financial Affairs Department | Sustainability Office Energy Management Unit Waste Management Committee Construction and Technical Works Department Department of Health, Culture and Sports | Achieved |
| | | T.29 Increasing the number of biodiversity conservation activities by 10% | 2023 | A.51 Carrying out at least one tree planting event every year to improve the natural environment or biodiversity (minimum 300 trees) | | | Achieved |
| Land | | T.30 To fully carry out sustainable use, protection and | 2023 | A.52 Ensuring all planting use minimum of 70% indigenous species, with a preference for drought-resistant species | | | Achieved |
| | G.24 Alien species impact reduction | restoration of the land | | A.53 Implement the plan for sustainable use, conservation and restoration of land | | | Progress |
| | G.25 Collaboration for shared land ecosystems | T.31 Creating policies to reduce the impact of alien species | 2023 | A.54 Establish alien species management system | | | Achieved |

2023 Progress

Alien species policy was created.

Restoration was made with special permission.

330 drought-resistant species trees were planted.

Brownfield areas of AGU were used for cultivation by Talas Municipality

Sustainable Farmed Food Policy was created.

AGU Bostan was realized in an 800 square meter area within the Sümer Campus, for an ecological, sustainable and public collective campus experience.

6. Supplier Management

| Dimension | Goal | Targets | Target Year | Activities | Main Responsible | Support departments | Status of activities |
|------------------------|--|--|----------------|---|---|--|----------------------|
| Supplier Management | G.26 Engagement & integration of supplier G.27 Sustainably harvested food management G.28 Sustainably farmed food management | T.32 Ensuring the participation and integration of all suppliers by 2027 | 2027 | A.55 Implementation of the Sustainable Supply Roadmap | Administrative and Financial Affairs Department | Sustainability Office Energy Management Unit Waste Management Committee Construction and Technical Works Department Department of Health, Culture and Sports | Progress |
| | | | | A.56 Evaluating the environmental impacts of the supply chain with survey | | | |
| | | T.33 Increasing the use of sustainably harvested food by 40% by 2026 | 2026 | A.56 Review of food and agricultural products specifications | | | Achieved |
| | | | | | | | Progress |

2023 Progress

Ethical Sourcing Policy was implemented.

Supplier Sustainability Survey was conducted.

7. Collaborations

| Dimension | Goal | Targets | Target Year | Activities | Main Responsible | Support departments | Status of activities |
|----------------|---|--|----------------|--|--|---------------------|----------------------|
| | G.29 Increasing collaborations with govern- ment | T.34 Collaborations with government institutions | 2023 | A.57 To carry out at least 3 collaborations on issues within the climate action plan | | All departments | Achieved |
| Collaborations | G.30 Increasing collaborations with NGOs | T.35 Collaborations with NGOs | 2023 | A.58 To carry out at least 3 collaborations on issues within the climate action plan | Vice rector responsible for stakeholders | | Achieved |
| | G.31 Increasing collaborations for cross-sec- toral dialog | T.36 Collaborations for cross-sectoral dialog | 2023 | A.59 To carry out at least 3 collaborations on issues within the climate action plan | | | Achieved |

8. Education, Training and Activities

| Dimension | Goal | Targets | Target Year | Activities | Main | Responsible | Support departments | Status of activities |
|--|---|--|----------------|---|---------|-------------------------------|-------------------------|----------------------|
| Education, Training and Activities | G.32 Conducting Educational programs | T.37 Increasing the number of Education, Training and Activities by 5% every year | 2023 | A.60 Organizing at least 3 Educational prevery year | rograms | Education Commission | Academic departments | Achieved |
| | G.33 Conducting Training programs | | 2023 | A.61 Organizing at least 3 Training programs every year | | Education Commission | Academic departments | Achieved |
| | G.34 Conducting Outreach activities | | 2023 | A.62 Organizing at least 3 Outreach projectory year | grams | Youth Factory | All departments | Achieved |
| | G.35 Conducting Access schemes | | 2023 | A.63 Organizing at least 3 Access schemevery year | nes | Technology Transfer Office | All departments | Achieved |

2023 Progress

a. Educational Programs

Sustainability oriented courses were prepared. The courses that address sustainability with its economic, environmental and social dimensions and are offered by the Sustainability Center are listed below. **CLICK HERE to access the course catalogs.**AGU Global Issues and Responsibilities Curriculum (GLB)

Affordable & Clean Energy

"Water Resources Engineering." (CE374), "Water & Wastewater Treatment Engineering." (CE 475). Clean Water Access Infrastructure in Developing Countries Course.

b. Training Programs

Think about the Future, Take Action! Trainer Training for a Sustainable Future Focusing on Classroom Teachers

• Learn-Transform Project from Kayseri Model Factory

Sustainable Cities and Communities Training

[&]quot;Sustainable Cities and Communities"

[&]quot;Climate Change Training Series".

9. AGU provides dedicated training on environmental aspects of Sustainability such as ISO 50001 Energy Management System Awareness Training, Energy Efficiency for employees, etc every year. Also includes orientation training for new hires and 186 people received 11.2 hours of training in 2023

| Number | Training Subject | Hour | Date | |
|-----------------|---|------|---------|--|
| 1 | Zero Waste Project Training | 2 | Mar.23 | |
| 1 | Quality Management System and PDCA Cycle | 1 | Oct.23 | |
| 3 | Grounding Training in Electrical Installations | 1 | Oct. 23 | |
| 4 | ISO 50001 Energy Management System Awareness Training | 1,8 | Nov.23 | |
| 5 | Energy Efficiency 1 | 0,6 | Nov.23 | |
| 6 | Energy Efficiency 2 | 1,1 | Nov.23 | |
| 7 | Energy Efficiency 3 | 0,4 | Nov.23 | |
| 8 | Energy Efficiency 4 | 0,6 | Dec.23 | |
| 9 | Energy Efficiency 5 | 1,4 | Dec.23 | |
| 10 | Energy Efficiency 6 | 0,8 | Dec.23 | |
| 11 | Energy Efficiency 7 | 0,6 | Dec.23 | |
| TOTAL (Hour) | | 11,2 | | |
| TOTAL (Minutes) | | 669 | | |

c. Workshops:

"Partnership for Goals"
International World Water Day
Life in Water
Sustainable Development Goals Workshop
Climate Action
Workshop on Energy Efficiency in Municipal Services and Heating & Cooling Sector

d. The seminars:

"Climate Change and Its Global Impacts"

"Roadmap for Preparing Your City's Local Climate Action Plan"

General Result

AGU has been awarded **THE Awards Asia**: Outstanding Contribution to Environmental Leadership for its activities.

AGU ecosystem is comprised of international, national, and local collaborations with organizations such as United Nations High Commissioner for Refugees (UNCHR), United Nations Development Programme (UNDP), UN Academic Impact, SDG Universities, Global Solutions Initiatives, and the Sustainable Development Solutions Network. In all of its activities, AGU seeks to increase its impact by forming strong partnerships. The AGU's ecosystem has two clear dimensions: (1) Corporate practices as an exemplary leader: Significant evidence for AGU's Outstanding Contribution includes its Strategic

Plan, Climate Action Plan, Zero Waste and LEED Certificate, ISO 14064:2018 Certificate, etc. (2) Teaching & research practices, to increase the awareness of citizens. AGU's departments such as the Career Center, AGU Academy, Creative Hub, Children University, Technology Transfer Office (TTO), and the Youth Office are tasked with providing instruction and research not only for students, but also for the broader community, including industry partners, kindergarten, primary, and high school students. To summarize, 2944 AGU students attended GLB course, 784 industry experts attended SDG awareness training for climate action, 757 kindergartens, primary and high school students attended environmental awareness training and workshops

CONCLUSION

The AGU Climate Action Plan reflects a commitment to promoting environmental sustainability not only on our campus, but also globally. This action plan is a reflection of our belief that we must take action in the fight against climate change and reflects our commitment to contribute to building a better world for future generations. Making this plan a success is not just an effort among university administration, students, and staff, but also requires the participation of all community members. Sustainability must become part of the daily life of each of us. Energy saving, waste reduction, green transportation and sustainability in education are areas that are our responsibility.

This action plan will not only make our campus more sustainable, but also provide opportunities for our students and staff to play a more conscious and active role in combating climate change. These steps we take towards a sustainable future can have positive effects both on our campus and around the world. Thank you to everyone who contributed to the success of this plan.
